NOTICE OF AVAILABILITY

Record of Decision for Operable Unit 4 – Site 5 and Offshore Areas Potentially Impacted by PNS Onshore Installation Restoration Program Sites Portsmouth Naval Shipyard, Kittery, Maine

The U.S. Navy proudly announces the signing of a Record of Decision (ROD) for Operable Unit (OU) 4, which includes Site 5 – Former Industrial Waste Outfalls, and Offshore Areas Potentially Impacted by PNS Onshore Installation Restoration (IR) Program Sites at Portsmouth Naval Shipyard, Kittery, Maine. The Navy and U.S. Environmental Protection Agency jointly signed the ROD in August 2013 with Maine Department of Environmental Protection concurrence. The ROD documents the selected remedies for OU4 under the federal Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). Fourteen monitoring stations were located within OU4 to address offshore contamination from past releases from Site 5 and PNS Onshore IR Program Sites. The OU4 remedies were selected based on these monitoring stations. For Monitoring Stations 01, 03, 04, and 12 (A and B portions), the Selected Remedies include dredging of contaminated sediment, dewatering of sediment, and disposal of dredged sediment in an off-yard landfill to eliminate potential unacceptable ecological risks. There are no unacceptable risks for Monitoring Stations 02, 05, 06, 07, 08, 09, 10, 11, 13, and 14; therefore, No Further Action are the Selected Remedies for these monitoring stations. The Selected Remedies for OU4 will allow for unlimited use and unrestricted exposure for the offshore area, such that land use controls, operation and maintenance, monitoring, inspection, and five-year reviews will not be required after removal of contaminated sediment from Monitoring Stations 01, 03, 04, and 12 (A and B portions). The ROD also includes the Navy's responses to the public comments received on the Proposed Plan. A copy of the ROD for OU4 is available for review at the following Information Repositories or on the public website:
